

Water Dispenser 1051 CLOUD WHITE With Refrigerator

Key Specifications & Data

- **Model / Color:** WD-1051 Cloud White — “With Refrigerator” variant. [Dawlance+1](#)
 - **Control System:** Mechanical (push / tap) operation. [Dawlance+1](#)
 - **Refrigerator Compartment:** Yes (mini refrigerator portion included) [Dawlance+2Japan Electronics+2](#)
 - **Tank / Flow Capacities** (for similar WD-1051 variants):
 - Cold water tank capacity: ~ 3.5 L [Dawlance+2City Electronics+2](#)
 - Hot water tank capacity: ~ 1.6 L [Dawlance+2City Electronics+2](#)
 - Cooling / cold water dispensing rate: ~ 2.4 L/h (or ~2.5 L/h, depending on variant) [Dawlance+2City Electronics+2](#)
 - Hot water / heating rate: ~ 5 L/h [Dawlance+2gsim2hwnpbvwtwmb1dg11z6.blob.core.windows.net+2](#)
 - **Overall Dimensions & Weight** (typical of WD-1051 top load models):
 - Width: ~ 34.5 cm [Dawlance+2City Electronics+2](#)
 - Depth: ~ 35.5 cm [Dawlance+2City Electronics+2](#)
 - Height: ~ 107.6 cm [Dawlance+2City Electronics+2](#)
 - Weight: ~ 17.25 kg [Dawlance+1](#)
-

Features & Highlights

- **“With Refrigerator” / Mini Bar Feature:** The model includes a compartment for cooling / refrigerating small food or beverage items. [City Electronics+2Ahsan Electronics+2](#)
- **Three Taps: Hot / Normal / Cold:** Users can dispense water at hot, room temperature (normal), or cold via three separate push taps. [Dawlance+2City Electronics+2](#)
- **“Bigger Tank / More Capacity” Marketing:** For some WD-1051 lines, Dawlance advertises: “17% bigger cold water tank, 60% bigger hot water tank, 40% bigger refrigerator portion” compared to earlier models. [City Electronics+2Japan Electronics+2](#)
- **Stainless Steel Tanks:** Some versions mention stainless steel water tanks (for hygiene) in marketing / product descriptions. [City Electronics+2Japan Electronics+2](#)
- **“Spill Free Cap” Feature:** The product line (WD-1051) often includes a “Spill Free Cap” to reduce ingress of plastic particles from the water bottle into the internal tank. [gsim2hwnpbvwtwmb1dg11z6.blob.core.windows.net+2Manuals++2](#)
- **Warranty:**
 - 3 years compressor warranty (for cooling / refrigeration parts) is commonly provided. [gsim2hwnpbvwtwmb1dg11z6.blob.core.windows.net+2Ahsan Electronics+2](#)
 - 1 year parts warranty for other components. [gsim2hwnpbvwtwmb1dg11z6.blob.core.windows.net+1](#)

Strengths & Use-Case Benefits

- Combines water dispensing (hot, cold, ambient) with a refrigerator compartment — useful for drinks or small food items.
 - Good balance of cooling / heating rates for typical household use.
 - Mechanical controls are simpler, less prone to electronic failure.
 - Spare parts / service likely available given that WD-1051 is a well-known model line.
 - Larger capacity and refrigerator portion improvements (per marketing) may improve usability vs older models.
-

Things to Verify / Potential Limitations

- The actual **cold / hot water output under heavy demand** may drop; always good to check with user reviews under heavy usage.
- The refrigerator portion is limited — cannot replace a full refrigerator, only useful for small items.
- Mechanical tap operation lacks precision control (i.e. no digital temperature setting or timers).
- As with any water dispenser, cleanliness, filter / tank maintenance is crucial.
- Confirm that the “**Cloud White**” version has all the same specs (tank volumes, flow rates, warranty) as the published WD-1051 variants, since sometimes color / design variants may have slight differences.
