

DBD-1035 Glass Door Bottom Load Water Dispensers

Overview & Features

From Dawlance's official site and retailer listings:

- Bottom load design with **inclined base** for easier bottle placement. [Dawlance](#)
 - **Empty Bottle Alarm** — beeps when the bottle is empty. [Dawlance](#)
 - **Auto Refill Technology** — water is pumped from the bottom-loaded bottle into the internal tank to fill glass / taps. [Dawlance](#)
 - **Large Capacity Cold Water Tank** ~ 3.5 litres. [Dawlance+1](#)
 - **Stainless Steel Tank** (for corrosion resistance / hygiene) in the cold / internal tank. [Dawlance](#)
 - **Single Hand Faucet / Tap Design** — one-hand pressing to dispense water. [Dawlance+1](#)
 - **Glass Front / Glass Door Aesthetics** — premium “glass door” styling on front panel. [Dawlance+2](#)[Modern Electronics+2](#)

Specifications

Here are the reported specs / capacities from retailer sources:

| Spec | Value |
|-------------------------------------|--|
| Cold Water Tank Capacity | ~ 3.5 L Dawlance+3 MNS+3 Modern Electronics+3 |
| Hot / Heating Water Capacity / Rate | ~ 1 L storage / or heating rate ~ 5 L/h (some listings) MNS+2 Dawlance+2 |
| Cold / Cooling Rate | ~ 1 L/h in some listings MNS |
| Hot / Heating Output | ~ 5 L/h (as per some retailer listing) MNS+1 |
| Voltage / Input | 220-240 V, 50 Hz Dawlance+1 |
| Tank Material | Stainless Steel for internal tanks to enhance hygiene & reduce corrosion Dawlance+1 |
| Loading Type | Bottom Load (bottle sits below, not top) Dawlance+2 MNS+2 |
| Taps / Faucets | 3 taps: Hot, Normal (ambient), Cold New Aftab Center+2 Dawlance+2 |
| Dimensions (approx) | H 43 in, W 14 in, D 14 in Daraz+1 |

| Spec | Value |
|----------|---|
| Warranty | 3 years compressor warranty (for cooling) is listed in many retailer pages. New Aftab Center+2Dawlance+2 |

Strengths / Advantages

- Bottom load system: you don't need to lift heavy bottles overhead — easier and safer.
 - The glass door / premium appearance gives a modern look (good for showrooms, offices).
 - Auto refill & empty bottle alarm add convenience and reduce user error.
 - Stainless steel internal tank is better for hygiene and longevity vs plastic tanks.
 - Decent cold water capacity (3.5 L) for moderate daily use.
 - Three taps (hot, ambient, cold) make it functional for varied needs.
 - Established brand (Dawlance) so spare parts / service likely available locally.
-

Limitations / Things to Verify

- The hot tank capacity / heating output seems modest — under heavy usage, hot water may run out or slow down.
- Cooling rate (1 L/h in some listings) is not very high, so in hotter climates or with many users, cold water may lag.
- The glass door / aesthetics add to cost; check if internal insulation and sealing are as good.
- Bottom load designs often have more moving parts (pump, hoses) — these need maintenance.
- Confirm that the warranty covers all functional parts (heater, pump, etc.) and not just cooling portions.
- Check clarity on electrical consumption / power ratings (watts) to ensure your local circuit can handle it.
